Submitter Comments:

I have been home-schooling my adhd,odd,asd son for the last five years after taking him out of a very expensive catholic school where he went from prep to year 4. In all that time with qualified teachers following the Australian curriculum his reading and writing were still at a prep level. Now that I can tailor a curriculum specifically for him he has improved exponentially and is even learning other languages. We are one of the 80% that don't use the ACRA and won't as it doesn't fit with my son's learning abilities and styles.
