Submitter Comments:

Children have a right to good education, the current education system is aimed at children following directives from corporate Governments. and holding them back from truth, children are not taught about the Commonwealth Constitution, the Highest Law in this Country. i had a Primary school teacher tell me that the Constitution is an American thing, this is unacceptable that an Educator of children does not know about the Commonwealth Constitution, teachers follow a dated system that has no basis in fact. the Government needs to remember that they are there to do our Bidding, we the people make our own decisions on how we live and what we do for our Children.
