Submitter Comments:

To the commission. I strongly object the proposed changes to the Education bill on the following reasons. Choice freedom of choice I believe that I should be able to choose how or the method for the best interest of my child. 2. I School my child, according to her interest and her needs, and I believe that being homeschooled is best for her mental health as well. 3. I believe that it is unreasonable to submit a plan overnight. It takes me six weeks to think about the following year and her plan for the following year so this is just an unreasonable request so it should be removed from the bill. My child is getting a great Education that suits her so I think that the propose changes should not happen. Thank you yours sincerely Sharyn.
