Subject: Opposition to Proposed Homeschooling Legislation Changes
Date: Sunday, 24 March 2024 8:09:35 PM

Dear Committee Members,

I strongly oppose the proposed changes in homeschooling legislation, specifically the mandate to follow a specific curriculum. Homeschooling allows children to learn according to their interests and abilities, and imposing a curriculum would restrict this freedom.

Homeschooling enables personalized learning experiences that foster curiosity and allow children to learn at their own pace. Mandating a curriculum disregards the diverse interests and talents of homeschooling students and may hinder their development.

I urge the committee to reconsider these measures and focus on supporting families in providing diverse educational experiences tailored to each child.

Thank you for your consideration.

Sincerely,
Leverne Knox
Homeschooling parent
