Subject: PROPOSAL TO EXTEND EMERGENCY POWERS TO 30 APRIL 2022
Date: Thursday, 1 July 2021 7:26:33 AM

Attention Elected Representatives,

The proposal to extend emergency powers for another year is both unnecessary and unacceptable. There is no emergency justifying this act. A few cases of Covid is not a pandemic. In Australia, just one person has died from Covid in 2021; unfortunately, the same is not so for those dying from vaccine reactions. These deaths now exceed 210. Thousands of people continue to die from heart disease so why is that not considered an emergency?

Of those 903 that died from Covid in 2020, two thirds were of advanced age and arguably would have also died from any other serious infection.

The proposal to extend emergency powers has nothing to do with public health, it is only about social control. It is nothing more than an implementation of Cultural Marxism and as such can be regarded as a treasonous act against the democratic freedom of Queenslanders.

Sincerely,
Damian Vella
