Subject: Re: Public Emergency Health Response Bill
Date: Thursday, 1 July 2021 9:11:54 AM

This Public Health & Other Legislation (Further Extension of Expiring Provisions) Amendment Bill 2021 is breathtakingly outrageous!

There seems to be little or no media coverage or words of advice from any legal bodies on this matter.

Imagine if Joh had done this, the media would be outraged...

This government operates with such insidious energy & I am vehemently opposed to this Bill.

At least provide the public with some scientific, peer reviewed studies on the efficacy of masks. The 50 or so scientific studies done to date according to various Medical bodies that I have studied (mainly from the USA) say the opposite.

Even the warnings given on the mask boxes say “they do not prevent viral infections”; the mask manufacturers obviously know how to protect themselves from Class Action Legal suits!

Workers in the NHS in the UK have stated that people are presenting with bacterial infections in the throat & respiratory tract as a result of breathing the toxins that are normally filtered & expelled by the respiratory system. All resulting from using masks over the longer term.

Lockdowns are a cruel & unusual punishment for the mostly healthy people in the population. The government should be beholden to the people - we are not beholden to the government. Our freedom is guaranteed as a Divine Right & cannot be taken away by government.

I didn't ever think that such action would be taken by the “party of the people” - the Australian Labor Party. This is all about power & control with a complete lack of empathy for Queenslanders.

Kind regards,

Margaret Comino
