

Letter to committee about the Qld bill extending emergency powers to 30April '22

I cannot believe that this state of emergency bill had been presented to parliament on 16th June'21 (videos date) when there was no virus transmission, just because the old was ending&holidays coming. This shows the main reason for the lockdowns&state of emergencies isn't the virus but a form of defiant control of the public's movements. This virus presents itself as having very predictable motives- close down holidays, break the economy&stop tourism.

I have read that the lady in Qld who works in the mines(from the horse's mouth-she herself placed this on her page)who has the delta version after she knew of her situation,went home&didn't go to all the places that was displayed in the govt information. It appears that these precautions are made up lies&blown out of proportion, I wonder for what reason?

Why when Australia was ahead, now has the worst reputation to the rest of the world of the handling of this virus? because of lockdowns? Other nations by now have made the decision to handle this virus like the flu-no masks or lockdowns, people who are sick present to hospitals/doctors, those vulnerable take precautions&the rest of us get on with our lives.

Stop the lockdowns which have been said, do not work but are breaking the economy of this nation.

Sue Innes
