Benjamin Lee Davis
[REDACTED]

I, Benjamin Lee Davis, completely object to your current proposed Bill, and any reason you may think you need to extend the state of emergency currently in place. I, as well as a Majority of our population, have grown tired and absolutely sick of the tyranny you and the rest of our government are upholding. Enough is enough, I will not sit back and watch our freedom and privacy be taken away from us, after both of our ancestors had gone to war to fight for, which If it comes down to it, myself and so many other Qld and Australian citizens will happily go to war to fight for again. There is insufficient evidence to show that we are in a pandemic, the percentage per capita of cases of covid are so far lower than the average cold and flu, which by the way have been killing more people than covid has. And your "vaccine" rollout not only is laughable, but will actually do more harm than good, not only is it not properly tested, not only is it causing medical issues to more people than covid actually is, but by vaccinating like this now you are only making the mutating strains stronger, which will spread faster and in turn make current vaccinations null and void. You and the whole government are criminals, you are employed by the people to work for them and make our country grow for the better, our taxes pay your wage, and you blatantly lie about how bad the vaccine is for us all and how miniscule the covid issue actually is, to only take away our freedom and rights. You are killing people yourselves by ruining businesses and people's lively hoods, people are going bankrupt and losing jobs, losing sanity, the suicide rate from all this will probably have higher numbers than covid deaths. Government officials are starting to not answer the hard questions that are known now to be lies and that the truth will bring you all undone. IT WILL NOT BE TOLERATED!!!! If the state of emergency allows you to lock us down over less than a handful of flu cases, or like in other states no cases at all, Us people, your citizens, will not sit idly and watch this unfold, there will be outrage, there will be repercussions, and there will be mutiny. I, like a lot of other Australians, are no longer oblivious to the communistic and dictating country you are turning us into, and more and more of us are aware of what you are doing. SO I OBJECT COMPLETELY TO YOUR PROPOSED BILL.
