The symptoms of 'Delta' as per the [health.gov.au](https://www.health.gov.au) website?

"People are reporting more commonly with the **Delta** virus: headache, persistent cough and sore throat, runny nose and a fever or high temperature"

Are you KIDDING me? In my day this was called a COLD.

You want to approve a state of emergency for a COLD?

You want to remove the rights and freedoms of Queenslanders for a COLD?

I can't even believe I'm writing this.

This has been blown out of all proportion, building fear and jeopardising our livelihoods.

You do not have my permission to carte blanche remove the freedoms which are our inalienable human rights.

GO TO BED PEOPLE. It's a freaking COLD.

Mina Hunt
