Hello

my name is Mieko Van Stokkum Tuckey, I live at [REDACTED]

my concerns have to do with the covid restrictions being put on people and business.

it is getting ridiculous!

masks that are proven to have zero effect on virus transmission.

vaccines without proper testing being forced on people.

more people have died or have now got serious injuries from the vaccine than the virus itself, people who have received the vaccine are still susceptible to getting the virus and are still told to wear masks and abide by all the rest of these ridiculous rules...

what is even the point of getting the vaccine?

is there something we are not being told?

we don't want more lockdowns

so much stress and heartache being forced onto our community.

there are not even any covid cases in our area, I don't get it.

all this is causing a big divide in the community.

if you would like to receive my vote in the upcoming elections, please put forward the voice of the people not the voice of yourself.

I speak for many, I hope you can get us some normality like Singapore is trying to get through.

sincerely, Mieko Tuckey
