Subject: Submission for Bill to extend Public Health Emergency Response measures
Date: Friday, 2 July 2021 10:31:47 AM

To Whom it May Concern,

I am sending this submission to inform you that, as a Queensland citizen, I do not approve of this Bill being created without the knowledge and consent of the general Queensland public.

I believe in democracy, transparency and the Queensland government being held accountable for their mistakes and sly gestures, such as this Bill.

It concerns me that currently, according to figures on the Therapeutic Goods Administration website, the vaccine is posing more of a health risk, to Queenslanders, than what COVID-19 is - yet it is under this State of Emergency that this Bill is pushing for an extension for, this experimental vaccine is able to be administered.

I see you, as do many more Queenslanders - and Australians - that what you are probably aware of.

We do not consent.

We will not be coerced.

Sincerely,
Emma Lee Davis
