RE: The Public Health and Other Legislation (Further Extension of Expiring Provisions) Amendment  
Bill 2021

Dear Sir/Madam

I am appalled that this new Bill has been snuck under the table with minimal discussion offered for debating its merits or inadequacies. At all times, the need for public debate, transparency and accountable government is paramount to continuing the freedoms that our forefathers fought for. I am not in favour of extending Governments ability to control our population, especially given that to this date there has been only 1 death from Covid since January 2021, and 318 deaths from the Covid vaccine.

Is it the intention of Government to continue to force Queenslanders to live under a state of emergency, even when there is obviously no such emergency happening?

I would be grateful if Government would publicly release their exit strategy for our way out of this current situation. Living life in a permanent state of emergency is simply unacceptable and quite frankly, unnecessary.

regards  
Leanne Sippel
