

I am making a submission for the Public Health and Other Legislation (Further Extension of Expiring Provisions) Amendment Bill 2021 on behalf of myself.

I DO NOT ADGEE WITH THIS BILL.

- In 2021 there have been **NO DEATHS** recorded from Covid-19
- In 2021 the amount of people who have contracted Covid -19 is 447 (as at 02.07.2021) **0.008% OF THE POPULATION** (<https://www.qld.gov.au/health/conditions/health-alerts/coronavirus-covid-19/current-status/statistics>)
- The total number of deaths **since the start of Covid-19** is only **7 deaths** (compared to road deaths for the 2020/2021 up to 27th June 2021 totalled **444 deaths**) Should we stop driving on our roads too? <https://www.qld.gov.au/transport/safety/road-safety/statistics>
- There is currently a **95.88% survival rate** (not including those currently with the virus).
- As at 02.07.2021 there are only **42 cases out of a population of 5.185 million people**. This is **NOT A PANDEMIC** by any means and this bill is an **injustice to the freedoms of the Queensland people**.

Please refuse to pass this bill and let us move on with our lives and businesses and treat this as a normal flu (which it is) and stop the madness and fear mongering.

Most people do not want the vaccine either as they do not feel safe in getting it and the state and federal governments can't even agree on it. Why would you want a vaccine for a disease which has more than a 99% survival rate?
