

Submission to Email: egc@parliament.qld.gov.au

Committee Secretary

Economics and Governance Committee

Parliament House

George Street

Brisbane Qld 4000

I, Judith Khan of [REDACTED], through this submission, am responding to a Bill, currently before the Queensland Parliament.

A Bill for An Act to amend the Body Corporate and Community Management Act 1997, the Corrective Services Act 2006, the COVID-19 Emergency Response Act 2020, the Economic Development (COVID-19 Emergency Response) Regulation 2020, the Environmental Protection Act 1994, the Explosives Legislation (COVID-19 Emergency Response) Regulation 2020, the Gaming Machine Act 1991, the Health Legislation (COVID-19 Emergency Response) Regulation 2020, the Justice and Other Legislation (COVID-19 Emergency Response) Amendment Act 2020, the Mental Health Act 2016, the Public Health Act 2005, the Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Act 2021 and the Public Health and Other Legislation (Public Health Emergency) Amendment Act 2020 for particular purposes.

I have added to my records the sections of these Acts to be changed, and am responding to sections of this Bill dealing with the Covid response.

With respect, I write this submission to Queensland Parliamentarians, as an Allied Health Professional, a Queenslander and concerned citizen of Australia; and a Justice of the Peace dedicated to protecting the rights of our citizens as these rights are interpreted through the integrity of our laws and Australian Constitution.

In my view, this current bill being placed before the Queensland Parliament, is an overreaching of the current powers now enforced in this state (and nation), in response to the Covid 19 flu.

To extend these Emergency Powers to the 30th April, 2022, can only be interpreted as an attempt to deny citizens the right to move freely and gather within society, without being fined, traced or tracked via electronic devices or paper records; mask wearing, and subjection to unreliable testing procedures; and the never ending push and pull lockdowns and division of citizens, denying them their right to work, privacy and sovereign rights within our nation, and indeed the global nation of humanity.

I also feel this current Queensland government has an opportunity to show courage and strength and act to go against the national and international narrative and hyper media saturation of the global narrative. Take for example the actions of the Finnish Prime Minister and the UK Cabinet who state: "It's all over! It's time to 'Live with COVID and you won't have to show Proof of Vaccination to attend to mass gatherings." To our State Premier Anastacia Palaszczuk, and Health Minister Dr. Janette Young, I applaud you for recently expressing your concerns on coerced vaccination of the young.

It is time to show compassion for citizens (especially the elderly, children and working adults) who are experiencing mental ill health right now, exacerbated by the stress of modern day living and the increasing restrictions being placed upon them and their loved ones.

Increased empathy and action is also needed for Australian citizens denied the ability to return home from overseas due to quarantine laws which are unrealistic and unnecessary.

It is time for our Queensland Government Health Department officers, to research other avenues of treatment, (which I am sure our compassionate and intelligent Health Professionals already have), besides the global call for vaccination (using experimental and increasingly dangerous substances and delivery mode, shown to cause not only mild and severe life long side effects in young adults, but also death).

There are many successful treatment protocols used and expounded by other global virologists, medical doctors and medical researchers, including steroids, the inexpensive proven anti inflammatory Hydroxychloroquin, antivirals such as Ivermectin and Fabipurivere and the preventative vital vitamin and mineral supplements and foods, to boost the immune system. Significant numbers of people have already researched and empowered themselves with these preventative protective protocols which enhance their immunity, health and wellbeing.

Our governments (State and Federal) must also realise that the call to be coerced with injections of untested and unproven substances goes against the innate body wisdom and integrity of most people and a majority are subjecting themselves to these coercive 'jabs' in order to move and travel freely, or indeed, their right to work - (health professionals, aged care workers, first responders, police etc). If vaccination is considered the only way to halt this ever evolving virus then enough citizens have received it to allow for the return to pre Covid living, here in this nation.

Might I suggest that you must realise that citizens are waking up to the myriad lies expounded, also by our national and state leaders; including the lie that humanity will constantly need to have these ongoing flu injections. Citizens are aware that without the constant media barrage; this flu would not even register on their radar. It would be nothing more than a flu which expresses itself more severely in those who are cognitively impaired, poor, malnourished, inactive, and immunocompromised.

Citizens (and National Governments such as Finland and the UK, quoted above) do not agree with the coercive attempts to implement an extra passport to travel overseas or one to enter venues, including work places, or other god given rights to express their humanity, and they are taking action by standing together peacefully and sharing their human love and compassion. and understanding, and the brave are responding to submissions being placed, to restrict both privacy and freedom.

Governments, should take note of the mainstream media which dare not speak out; and express goodwill towards those citizens taking part in peaceful marches, going on here, and in all countries of the world. Citizens are watching to see if our own leaders will show strength and common sense to go against the global narrative.

Sincerely,
Judith Khan
