I wish to oppose the Bill tabled in parliament recently regarding the emergency powers being extended until April 2022. These powers are not necessary and I believe goes against our 1901 constitution.
I believe I am a free human and wish to keep it that way, and feel it is my duty for the future children of this once great nation to fight for them. Continually extending your emergency powers for a few positive cases of is absurd. This is how I see it. The PCR tests kits are not fit for purpose even the inventor of the test kit explains that running the test at more than 24/25 cycles (or amplification) will turn up a positive case for whatever you are looking for. So you can create a pandemic at any time you want. The virus its self has a high recovery rate in most people. There are many medications available to treat people and prevent this disease. QLD government has vilified one such treatment and banned it from use. The vaccine has only provisional approval by the TGA which is why I believe you need the emergency powers being in place to legally inject people. There is growing numbers of people in the community who are afraid of where this regime is going, and what's the end game.
SO I OBJECT TO THE CONTINUATION OF THESE EMERGENCY POWERS STRENIIOUSLY

Sharon Vallance
