**Subject:** Submission on Proposed bill to extend emergency powers

To whom it may concern,

We absolutely opposed the extension of any emergency powers by the Queensland Government.

There is no emergency and there has been only one COVID death in Australia this year and 912 last year which is much less than the average flu season.

There should be no reason why the government should be able to dictate the free movement of citizens, our ability to travel, our ability to run our businesses to earn a living. This is unconstitutional and infringes upon our human rights.

Please refrain from your attempts to extend the emergency powers immediately.

Regards  
Helena Laureth Craggs
