I am writing this email of Submission for the Public Health and other Legislation Ammendment Bill 2021. This will be my first one ever, but i feel very strongly about this matter.

For starters I and many other Australians are quite angered that a Bill has been secretly created and trying to be passed in Parliament without the public knowledge.

It seems that many politions, governor's and in house representatives to name a few who have been appointed in Parliament forget that the Australian people have appointed you to be their voice, not for you to take matters into your hands to secretly pass Bills that benefit only yourselves whilst leaving a negative affect on the Australian People and their rights.This definately shows how out of touch the Australian government is with its people.

Under no circumstances have you listened to Australians and this is quite evident so far during this so called pandemic and with your non transparency and this is why the Australian people don't have trust in you.

By having this Bill, this will affect the Australian People massively in the areas of Mental health, income and jobs and our economy this is just a few, but you already know this. This bill go to ammendment 2021 goes against many laws that protect our people and are depicted in the Australian Constitution such as: The Australian Privacy Act 1988 and The Australian Biosecurity Act Section 60 and 61 and yet you keep forcing these mandates etc on people even when you know it goes against our own laws.

I am hoping sooner rather than later people will stand up for their rights as what your doing is considered crime against humanity. I hope you reconsider passing the Bill as it under no circumstances benefits the Australian People and like it or not Covid like many other viruses are here to stay.

Kind Regards,

Indi coe
