Subject: Submission for Public Health and Other Legislation (Further Extension of Expiring Provisions) Amendment Bill 2021

I would like to put forward my submission to deny this bill for the following reason:

The current Covid Pandemic is every changing and at times rapidly. I do not feel that the extension of Expiring Provision is warranted and should remain at the current 3 months. There is no evidence that the situation will not change significantly resulting in these measures not being required for the extended time period.
