**Subject:** Submission against extending Emergency Response Measures

Simon Giles  
[REDACTED]

I would like to make a submission apposing the extension of the Emergency Response Measures Bill to 30 April 2022.

I believe as a QLD resident that we as a people are capable in reaching an understanding of adaptation to this pandemic that does not include 'locking down' its residents as a measure to contain. We need to be able to follow the world leaders from other countries in being able to adapt to the situation without crippling the well fares and mental health of those who live in QLD in locking them down. Many choose to treat it like the flu and adapt, why do the leaders of QLD not see this as a plausible answer to help everyone who live here in QLD.

Regards

Simon Giles
