

To the Economics and Governance Committee,

It's time to stop all COVID-19 restrictions and enforcements. It is clear after 18 months what COVID-19 is, how to treat it and who is at risk. Those who are at most risk have already taken the trial gene therapies, while the rest of the population would have a higher chance of becoming seriously ill from the gene therapy than the disease. Open up the state and let us live our lives.
