---

Hello,

I am disappointed we keep extending the SOE and I think this needs to stop. There is no merit to this rather than to control and direct the members of the public for your Covid19 agenda.

The vaccine doesn't work, people are still being infected. I can tell you from experience that Covid does not kill or injure everyone who gets in in fact even the studies agree with me. The mask mandates, the lockdowns need to end. Stop taking away people's freedom! Most of us are old enough to make informed decisions on our own health and safety and this is unheard of by declaring an SOE for the flu. I don't need a lecture about how deadly Covid is because i've had it and I didn't die! Stop the Fearmongering.

regards,

• Matthew Robert Halse
