**Subject:** opposition to Bill Extending State of Emergency

**Categories:**

**Dear Committee Secretary**

**According to the definition of an “Emergency” it should be “a serious, unexpected, and often dangerous situation requiring immediate action.”**

**Please note the importance of the words “Immediate Action” . It does not say ongoing forever extending action as all Emergencies are sudden occurrences not ongoing events. The bill is unlawfully going against Federal Biosecurity laws by providing additional powers to a state government that believes it has the right to try and keep all citizens safe, yet it discriminates as all citizens are not kept safe from all other diseases/illnesses/dangerous death occurring situations that could reasonably occur eg a Mask isn’t going to protect the population from contracting diabetes, cancer, Mental illness caused by restrictions, car accidents etc.**

**It appears this extended state of emergency is only for COVID-19 and Therefore these state of emergency extensions discriminate against some of population by not protecting and keeping us safe from all the other illnesses and events that could reasonably be expected to develop in humans and result in sudden emergency illness or sudden emergency death. I therefore request this bill to be rejected and the state of emergency either removed and therefore all emergency vaccines use ceased, or the bill is to be amended to cover all emergency situations to keep our population truly safe and not be a discriminatory bill.**

**Kind Regards  
Richard Eric Nelson**
