Subject: Public Health Amendment Bill 2021 - I DO NOT CONSENT

To the Committee Secretary

I, Kristy Nicole Curita, as a citizen of Australia residing in South Brisbane QLD, **do not consent** to the extension of emergency measures and call to END all emergency measures forthwith within Australia. In order to 'return to normal' we must do exactly that! Just open everything back up and stop shoving an EXPERIMENTAL gene-therapy jab down our throats through COERSION (illegal), fear tactics, bribery, manipulation and plain LIES. REMOVE mandates at once and make everything optional. "Vaccine" OPTIONAL, masks OPTIONAL, Self-quarantine OPTIONAL. Countries all around the world and some US states have returned to 100% NORMALCY and statistics have changed dramatically proving that a society can thrive and gain herd immunity NATURALLY by ALLOWING the virus (that is non-threatening to the majority!) to run its course and be treated as a normal flu (of which over 300,000 deaths occurred in 2019). Some third world countries who don't even have a medical system are living now as if covid-19 had never even existed! It's OBVIOUS these extreme emergency measures DO NOT WORK and frankly it's embarrassing that you have jumped all the way back to the beginning with these lockdowns. Lest we the people lose ALL FAITH in the once greatest medical system in the world. This is a democratic nation and you are outnumbered by the people and will lose the last bit of credibility should the bill be put through. If you have any form of intelligence or spine you would conclude that the 'science' presented by Fauci, WHO and the CDC is misinformation, incomplete, of corrupted nature and total government OVERREACH. THERE IS NO SUCH THING AS COVID-SAFE. I urge you please to let us return to normal now.

Sincerely,

Kristy Nicole Curita
