Subject: New Qld Bill to Extend Emergency Powers to 30th April 2022
Date: Monday, 5 July 2021 9:19:51 PM

I am writing in regard to the extended emergency act till April next year.

I would also like to refer you to the Nuremberg Code Article 6, Session 3, which outlaws forced medical procedures (which includes wearing a mask) and especially mandatory vaccinations.

A lady wanting an abortion is able to have one on demand. She says 'My body, my choice', although she is killing someone else's body, not hers. I want to be able to say the same, 'My body, my choice's

I strongly disagree with this Bill getting passed, and pray that one day soon, that politicians will see the mess they are creating out of nothing more than a virus which has killed 1 person this year, whilst the jab has killed over 210 people and has had adverse results for tens of thousands.

Thank you for taking the time to read this

Adriana Busstra
