

David Grisbrook

There should be no extension of powers and even the current ones should be curtailed while the public can have no confidence in our government or it's senior employees.

While John Howard was Prime Minister a 90 year suppression order made against alleged evidence against 28 pedophiles including a former Prime Minister. Senator Heffernan raised this in committee. It is one of many such orders in the federal parliament.

The last paragraph of this 1991 newspaper article reads "The cult was said to operate Australia-wide, and allegedly involves high-profile figures in the law, medicine, the media, police and academia. If this cult is continuing it may involve current senior government officials. This has not been investigated.

What concerns me is that list of alleged offenders matches the list of people telling the public there is a pandemic and what they should do. I see no tradies, small business owners, anti-vaxxers or conspiracy theorists listed. I do see people who accumulate power. Do not give them more. The corruption and stink that is all Australian governments is becoming widely spoken about in the community. Is there not one person with integrity left?
