Subject: Fwd: I Do Not Consent to the New Proposed Bill Extending Emergency Powers to April 30 2022
Date: Tuesday, 6 July 2021 11:38:07 AM

Dear committee members,

My name is Sally Jane Morgan and I am writing to you because the proposal to extend the emergency powers to April 30 2022 is an outrage. I, with many others will not consent to the proposed new bill.

I normally don't pay any attention to conspiracy theories however there is momentum gathering of more and more of us that are increasingly suspicious of the decisions the Qld government is making that don't add up to the level of risk Covid poses to Queenslanders. Government control is becoming so oppressive It feels like we are living in a country with a Dictatorship and the people will only tolerate so much.. It is so obvious to a growing number of people that there has to be another agenda here and the possibly of what that could be is horrifying.

To lockdown, wear masks, inject experimental vaccines, check in, cause economical pain, business closures, job losses, mental health issues, domestic violence, suicides, violence, over a virus that hasn't even reached an epidemic here in this country, makes absolutely no sense. Except of course more control for the few that already control almost everything and huge profits for pharmaceutical companies.

It is totally unnecessary, extremely unwise and is inhumane.

I urge your committee to reconsider. Surely you all have families, relatives and friends who will be greatly affected by these measures.

There are a lot of very angry and aggressive people out there and I fear if the suppression continues the outcome would not be beneficial to any of us. This is not the way to go, unless you want a revolution on your hands.

Thank you for your time.

Kind regards,

Sally Morgan
