Submission :

Public Health and Other Legislation (Further Extension of Expiring Provisions) Amendment Bill 2021

<https://www.parliament.qld.gov.au/work-of-committees/committees/EGC/inquiries/current-inquiries/PHOLFEEPAB2021>

I am writing this submission as a concerned Australian Queensland woman.

\*I would like my personal details withheld as I do not trust this government and want it noted that I fear retaliation for voicing my submission but as a concerned Australian I feel it is my duty.

I would like to begin my submission with the following quote from JFK, read just before his assassination;

*"For we are opposed around the world by a monolithic and ruthless conspiracy that relies primarily on covert means for expanding its sphere of influence -- on infiltration instead of invasion, on subversion instead of elections, on intimidation instead of free choice, on guerrillas by night instead of armies by day. It is a system which has conscripted vast human and material resources into the building of a tightly knit, highly efficient machine that combines military, diplomatic, intelligence, economic, scientific and political operations. Its preparations are concealed, not published. Its mistakes are buried, not headlined. Its dissenters are silenced, not praised. No expenditure is questioned, no rumour is printed, no secret is revealed. It conducts the Cold War, in short, with a war-time discipline no democracy would ever hope or wish to match."*

This proposed extension and/or any legislation or acts in reference to "Covid Pandemic" must cease IMMEDIATELY.

There has been a total of **7** deaths due to covid in Queensland during the whole 18 months of the "Pandemic" ..

In 2020 **48,099** Queenslanders died from cancer.

...out of a population of over 5 million people.

**910** Covid deaths Australia from a population of **26.7 million**

CDC report: Just over 5% of these deaths, COVID-19 was the only cause mentioned on the death certificate.

The first covid death in Qld was 13 March 2020 - the last **13 April 2021** - the one before was

**ONE (1) year earlier**

-18 April 2020!

Out of that 7 covid deaths in Queensland, **6** of them had a comorbidity.

The youngest was **68** years old. 3 were in their 70's and 3 were in their 80's.

The 7th doesn't list if they did or did not have a comorbidity. 5 of the 7 were on a cruise ship...

All this money spent on Covid would have been better to be sent back into the communities to provide/subsidise fresh food and health education to strengthen the public's immunity rather than money thrown again into big pharma who only line pockets and make people perpetually ill.

Covid tests 2,983,277 x \$50 per test = \$149,163,850. For a 99.997% survival rate?

Australian lab facilities are running the PCR tests at 35-45 cycles when the Nobel Laureate inventor of the PCR test, Kary Mullis, said, prior to his untimely death, running cycles over 27 you can find "almost anything in everybody" and that this PCR test was not made to detect any type of infectious disease. It's designed to pick up a signature of DNA and RNA of the person being tested."

The Australian Therapeutic Goods Administration (TGA) COVID-19 vaccine weekly safety report - 01-07-2021 confirmed there has been **335** covid vaccine deaths.

**17** in the week ending 1/7/21 alone while there were zero (**0**) covid deaths.

Nuremberg code: <http://www.cirp.org/library/ethics/nuremberg/> \*Permissible Medical Experiments below.

Unfortunately TGA doesn't provide detailed adverse reaction reports like the USA VAERS system so we are unable to see if we also have reports of urgent care (44k), hospitalisations (20k), unusual pain, neurological responses, disabled (4.5k), bell palsy (2k), life threatening reactions (59k), heart attacks (2k), bleeding, clotting, loss of sight/speech/smell and miscarriages (652). The Australian public can't even locate data on how many covid vaccine deaths per state. There is more than enough evidence to declare the covid vaccines unsafe for humans.

The covid vaccine is on **TRIAL** until 31 January **2023** and the people of Australia are not being told the truth about the adverse reactions and deaths. They keep getting fear pushed on them through reporting of ramped-up PCR cycles producing "cases", actual covid and covid vaccine deaths not being honestly reported.

On the 7 June 2021 the TGA approved to "incentivise" the experimental vaccine/gene therapy.

Are we soon going to see offers of free ice cream like they are peddling to children in Canada (without parental consent!), or a years free Beer or Donuts like in the USA?

This is unscrupulous behaviour and needs to cease immediately.

Dr. Angelina Farella, a Texas paediatrician with 25 years of experience on the stand in USA Congress.

Senator Hall; "Have you ever seen another vaccine that was put out for the public that skipped the animal tests?"

"Never before," Dr. Farella said. "Especially for children."

Hall continued, "What I have read, they actually started the animal tests and because the animals were dying, they stopped the tests."

"Correct," Dr. Farella responded.

"Folks, I think it's important to understand here that what we're talking about is the American people are now the guinea pigs," Hall stated. "This is the test program that's going on. They didn't do the human testing and they stopped the animal tests because the animals were dying. And then they turned it out for the public. And we are now looking at businesses that want to mandate that this experimental vaccine be given to people as a condition of their employment."

### **This latest extension request also intends to encroach on our election process!**

Australia has seen how "COVID-safe" measures had affected the 2020 USA Presidential Election.

\*The Maricopa Forensic Election Audit, (other states soon to follow suit), have uncovered election fraud that has stemmed from these sort of rules. **Hands off our already questionable election.**

Australians know what is going on and we politely request that this madness cease now.

### **Australia SAYS NO!**

It is clear there is NO PANDEMIC!

No to "Covid Passports"

No to Agenda2030.

No to the "great" reset.

Millions peacefully protest, breakthroughs around the world and the media is silent, while godless socialist such as BLM and ANTIFA violently push their agenda seemly with the approval of those who seek to silence the majority.

All of these facts mentioned in this submission are only the tip of the iceberg.

Anyone involved in this covid/green new deal/globalist agenda/climate change MUST be removed from their position and criminally investigated IMMEDIATELY with full transparency.

Australia must immediately start the process to remove the United Nations/World Economic Forum/IMF and any other unelected foreign corporation from Australian government and council. The education system completely reviewed.

Permissible Medical Experiments

The great weight of the evidence before us to effect that certain types of medical experiments on human beings, when kept within reasonably well-defined bounds, conform to the ethics of the medical profession generally. The protagonists of the practice of human experimentation justify their views on the basis that such experiments yield results for the good of society that are unprocurable by other methods or means of study. All agree, however, that certain basic principles must be observed in order to satisfy moral, ethical and legal concepts:

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment.  
  
The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.
2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.
3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results justify the performance of the experiment.
4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
5. No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.
7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability or death.
8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.
9. During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.
10. During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him, that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

## Public Health and Other Legislation (Further Extension of Expiring Provisions) Amendment Bill 2021

[Inquiry Overview](#)[Related Publications](#)[View Submissions](#)

### Public Health and Other Legislation (Further Extension of Expiring Provisions) Amendment Bill 2021

On 16 June 2021, the Minister for Health and Ambulance Services, the Hon Yvette D'Ath MP, introduced the Public Health and Other Legislation (Further Extension of Expiring Provisions) Amendment Bill 2021 (Bill) into the Queensland Parliament. On 18 June 2021, the Bill was referred to the Economics and Governance Committee for its consideration and report to the Parliament by 6 August 2021.

**View** [Statement of compatibility with human rights](#)

#### Objectives of the Bill

In light of continuing risks associated with the COVID-19 pandemic, including recent recurrences of community transmission, the Bill proposes to:

- further extend the operation of a range of legislative measures implemented to facilitate the health response to COVID-19 and to minimise economic and other impacts
- implement additional, minor improvements to those provisions, to:
  - clarify that quarantine directions may be served electronically
  - establish a new prepayment system for quarantine fees, including allowing for the prescription of cohorts for whom fees must be paid in advance or for whom fees may be waived, and supporting more flexible payment and collection arrangements (including refund provisions).

The extension provisions follow previous temporary extensions effected by a series of Acts of Parliament in late 2020 and 2021, under which the majority of measures are due to expire on 30 September 2021. The Bill would extend this legislative expiry date to 30 April 2022, or an earlier date to be prescribed by regulation.

The temporary measures which are to be further extended include:

- increased powers for emergency officers and the Chief Health Officer to impose restrictions on the movement and interactions of persons, facilitate contact tracing, and enforce quarantine requirements
- amendments relating to attendance requirements for meetings of various groups and agencies and for the conduct of proceedings of courts/tribunals and other bodies (including provisions to facilitate remote attendance, voting, and authorisations using audio or audio-visual links)
- modified notification requirements (allowing electronic notification) for certain proposals for community consultation or for the issuing of notices to individuals
- various amendments relating to planning requirements and environmental approvals
- amendments relating to access to relief measures for tenants and commercial lease holders
- amendments relating to bodies corporate and the manufactured homes sector (including providing for the deferral of fee contributions and limitations on increases to site rent)
- various measures to facilitate the holding of state by-elections and local government by-elections and fresh elections in a COVID-safe manner
- provisions enabling variations to liquor licensing to support temporary takeaway sales by operators of licensed venues disrupted by COVID-19
- public health related provisions governing the care of persons with a cognitive or intellectual disability, the delivery of mental health services, the operation of prisons and youth detention centres, and related measures.

#### Call for submissions

The committee invites submissions addressing any aspect of the Bill from all interested parties. The committee would appreciate you passing its call for submissions on to anyone you believe may be interested.

Guidelines for making a submission to a parliamentary committee are available here: [Guide to making a submission](#). Please ensure your submission meets these requirements. The closing date for providing a written submission is **5pm, Wednesday 7 July 2021**.
