**Subject:** Emergency powers extension Bill  
**Date:** Tuesday, 6 July 2021 8:02:42 PM

---

Dear Committee members,

I wish to submit my thoughts on the proposed extension of emergency powers bill.

The lockdowns and other covid related directives are based upon 'cases' which are based upon PCR tests which have been found to be unreliable and inconsistent.

In fact, the creator of the PCR test, Kary Mullis, said that it cannot show you that you are sick.

So my question is why are we basing the necessity of lockdowns on a test that isn't even reliable ?

Lockdowns that have in fact caused more harm than good.

Hundreds of scientists and doctors around the globe are questioning the whole narrative being perpetuated by governments pertaining to lockdowns, masks and proven medications to fight respiratory illness which have been restricted

for use ?

Are all these experts wrong ?

Here in Australia we have had maybe 2 covid deaths so far this year ?

And yet there is still discussion about the necessity to extend powers to allow these unnecessary directives to continue to happen ???

The devastation to business and families is beyond repair. The suicides alone in Australia far outweigh the lives supposedly lost to covid.

The masks are ineffective. They do nothing at all to stop a virus.

The boxes they come in even say so.

The QR code's are a total invasion of our privacy.

There is even questions surrounding the unauthorised use of the data being collected.

A thorough investigation is needed.

Stop the lockdowns.

Stop the masks.

Stop the testing.

Stop the QR codes and contact tracing.

Yours sincerely

Terri Groth
