Subject: Submission to Public Health and Other Legislation (further extension of expiring provisions) amendment bill 2021
Date: Wednesday, 7 July 2021 8:33:43 AM

To whom it may concern,

I am making this submission regarding QLD's Public Health and Other Legislation (further extension of expiring provisions) amendment bill 2021, in which you are seeking to not only extend the current measures for longer durations, but also to increasing the amount of measures (and therefore fines) that the government can impose. This submission has been sent prior to 7th July 5pm as required.

I am deeply against an extension to these already tyrannical powers these politicians and their stooges have placed over the people of Queensland. Last I checked I am an adult and could (before Covid) make my own decisions rather than have this nanny state and federal government; deciding what is best for me.

Apparently the CDC has admitted there never was a pandemic by updating the real figure of deaths in the USA where they died of supposedly Covid and nothing else is actually only 6% of the reported death numbers. Australia hasn't been as forthcoming with the data, not separating those that had other comorbidities.
<https://rightsfreedom.wordpress.com/2021/07/02/according-to-the-cdc-there-is-no-covid-pandemic-there-never-was-a-covid-pandemic/>

Even the Australian governments' own numbers do not give any indication that there is anything to be worried about. A total of 7 deaths from Covid in QLD, and 910 in the whole of Australia since the start of Covid in January 2020. How many people died in Australia of influenza in 2017 then? Apparently 1255 a significantly higher figure (by 38%) than those lives that were supposedly lost to Covid. Why didn't we wreck the economy and violate every Australians' human rights back then? Also in 2017 Diabetes took 4,839, Dementia took 13,729 and the highest killer was heart disease at 18,590. These figures are so much higher than those that have been attributed to Covid, yet we've thrown our economy into the toilet and invested so much into fighting this Covid only.

See references from YOUR own data:

[3303.0 - Causes of Death Australia - 2017](#)
https://www.abs.gov.au/ausstats/abs@.nsf/Lookup/by%20Subject/3303.0~2017~Main%20Features~Australia's%20leading%20causes%20of%20death_%202017~2

Of the total deaths in Australia due to Covid only 5 have occurred since October 2020, and of those only 1 this calendar year!

<https://www.covid19data.com.au/deaths>

Yet 335 people have died that recently had a Covid19 vaccine in this calendar year (since vaccines only came out this year)! Of course the report says that none of these deaths were caused by the vaccine, however if we use the CDC's original way of counting Covid deaths (and no doubt similarly applied here in Australia), then the whole 335 (and more) would be counted as they would have died having had the vaccination. Those that supposedly died of Covid, actually only died having tested positive, but actually 94% died of other comorbidities. Why aren't the tally of the side effects being reported constantly on the TV?
<https://www.tga.gov.au/periodic/covid-19-vaccine-weekly-safety-report-01-07-2021>

Since when have we reported on the number of cases of influenza constantly on the TV; in an attempt to put fear onto the Australian public? Answer: Never. So why have we been reporting cases of Covid in the last 2 years? It appears to have occurred so that we would willingly give up our rights.

I'd prefer to make my own decisions and believe that we should face Covid with the very little amount of respect it deserves. The government itself explains it as either similar to a bad flu, or something that you may not even know that you have. Stop the [REDACTED] open up, stop telling us what to do, stop giving yourself more powers, stop giving the police more powers, they aren't even doing their job anymore, more concerned over fining grandma or average Joe for not wearing a muzzle, or gathering for a bbq or speaking against the government. Other places in the world have decided to live with Covid, UK and Singapore made these announcements recently. Instead of fighting something that is inevitable and wrecking the economy and peoples lives, we should live freely with Covid. Those that are afraid or vulnerable, can do what they want to do to protect themselves.

There is a good meme getting around: "Ever wondered how many people you've killed by spreading the flu in the last 10 years? me neither, keep you manipulative guilt to yourself." and that is all these measures/restrictions are!

I definitely do not support extending or increasing any powers this government (both state and federal) has over Australians for any reason, in fact I believe it should release all Australians of it's grip on our throats for no valid reason. Lift all restrictions due to Covid.

Sincerely
Travis James
