**Subject:** I DO NOT CONSENT

To Whom it may concern,

I am writing to make sure that my point of view is considered in the deliberations regarding this abhorrent bill that was put forward on the 16 June 2021, by the Minister for Health and Ambulance Services, the Hon Yvette D'Ath MP.

The Queensland Government has failed the people of Queensland.

This fight is not between the left and the right, it's about good versus evil. The Constitution of Australia is about the people's freedoms and our right to choose what happens to our body's. My grandparents and great grandparents fought in wars to make sure that our freedoms would continue.

The Palaszuk government is all about stripping those rights away.

The Palaszuk government is quick to say they are making these decisions for our protection, but really they are not. This is insidious, considering there is no real threat against the people. Covid19 has a 99% recovery rate. We have had only one person die this year, and they weren't even Australian. The federal and state governments alike are scamming and fear mongering the people unnecessarily. You should be absolutely ashamed of yourselves.

The aged care sector is full of people who have worked hard, paid taxes, raised families, volunteered in the communities, and done their fair share. This vaccine has been pushed upon them in their later years, not to protect them, but to use them as an example. These poor souls are the faces of malicious intent on behalf of our government. Instead of allowing these poor souls to live happily till their last breath you have imposed that every death in the aged care sector has been a covid death. Old people in these facilities die. Unfortunately many people see their last days out at a nursing home.

If the Palaszuk government were doing the right thing for the people of Queensland they would not be pushing the vaccines, and would be open to use **Ivermectin and or Hydroxychloroquine** to help those few who were unfortunate to become sick with covid19. These two drugs are being used in numerous states around America and numerous places around the world with great success, but the Australian people are being pushed to have the vaccines. **This is criminal considering the vaccines are an experimental trial that does not finish until the end of 2023.**

Anybody who has pushed the vaccines has blood on their hands. The Nuremberg trials of 1947 state that we have freedom of choice as to what happens with our own bodies. The State and federal governments do not have the right to force the vaccines on us.

To force our already understaffed nurses and aged care workers to have this vaccine is abhorrent and criminal. PEOPLE HAVE A RIGHT TO SAY NO TO THE VACCINE WITHOUT GETTING FIRED OR STEPPED DOWN. Students have a right to complete their nursing or aged care studies without fear.

Michael O'Neill from IMOP has proof that our TGA has not done sufficient testing of the vaccines, and they should be stopped immediately. The FDA in America has not will not be approving the vaccines.

So the BILL put forward on 6 June, wants our state government to have the powers to keep QLD in a State of emergency until April of 2022 to continue the onslaught of vaccinating and dictating to our people.

To this I can honestly say NO WAY, TOO!!!

The temporary measures which are to be further extended include:

- increased powers for emergency officers and the Chief Health Officer to impose restrictions on the movement and interactions of persons, facilitate contact tracing, and enforce quarantine requirements - **NO WAY**
- amendments relating to attendance requirements for meetings of various groups and agencies and for the conduct of proceedings of courts/tribunals and other bodies (including provisions to facilitate remote attendance, voting, and authorisations using audio or audio-visual links) - **NO WAY**

- modified notification requirements (allowing electronic notification) for certain proposals for community consultation or for the issuing of notices to individuals. - **NO WAY**
- various amendments relating to planning requirements and environmental approvals - **NO WAY**
- amendments relating to access to relief measures for tenants and commercial lease holders - **NO WAY**
- amendments relating to bodies corporate and the manufactured homes sector (including providing for the deferral of fee contributions and limitations on increases to site rent) - **NO WAY**
- various measures to facilitate the holding of state by-elections and local government by-elections and fresh elections in a COVID-safe manner - **NO WAY**
- provisions enabling variations to liquor licensing to support temporary takeaway sales by operators of licensed venues disrupted by COVID-19 - **NO WAY**
- public health related provisions governing the care of persons with a cognitive or intellectual disability, the delivery of mental health services, the operation of prisons and youth detention centres, and related measures. - **NO WAY**

**ENOUGH IS ENOUGH.** The people of Australia have been through enough. The idea of having Qld in a constant state of emergency for another 7 months is abhorrent. The rise of anxiety, mental health issues, alcoholism, domestic violence is through the roof. You may not care about the people of this state, but we do. It's time to take us seriously.

We have a right to go to church and worship. We have a right to live peacefully without fear of our government overthrowing our holiday plans, we have a right to open businesses and keep them open, we are all essential workers, and we have a right to feeling peaceful in our nation without fear of forced vaccines that have not yet been trialled properly. **We do not need masks or QR codes. STOP TRYING TO CONTROL US!!!!**

Australia is a free country. If our leaders can't allow us to live our lives without interfering and making our lives unnecessarily difficult, then it is time we got a new government.

Kind Regards,

Sarah Keetley
