Subject: Submission to Public Health and Other Legislation (further extension of expiring provisions) amendment bill 2021
Date: Wednesday, 7 July 2021 3:10:41 PM

To whom it may concern,

I am making this submission regarding QLD's Public Health and Other Legislation (further extension of expiring provisions) amendment bill 2021, in which you are seeking to not only extend the current measures for longer durations, but also to increasing the amount of measures (and therefore fines) that the government can impose. This submission has been sent prior to 7th July 5pm as required.

I am very strongly opposed to an extension to these already tyrannical, unnecessary powers and breaches to human rights. I was not informed nor voted for a dictatorship or to live in the state of Queensland instead of Australia. In fact I have never been formally informed of any of the ridiculous rules that have come with this legislation, instead the Qld Government sees it fit to notify people of any new rules they have decided to make up through social media and mainstream media, neither of which I pay any attention to. In a free society I should be able to make my own obviously far more educated than QLD health decisions for my health myself.

These Powers CANNOT be extended because the QLD Government, QLD Health and QLD Police service have proven consistently that they cannot be trusted with such power. The Police are out of control assaulting people for not wearing a face mask. A ridiculous new rule in Queensland with absolutely NO Scientific evidence to support it. In fact "Dr" Young should be fined in accordance with previous legislation during the 2004 Pandemic when retailers could be fined up to \$17,00 for selling face masks that were of no benefit in preventing infection. Anyone who can read scientific data knows that a face mask as protection against a supposed virus is as useful as chicken wire to protect your fruit trees from fruit fly! Anyone who says different is either lying or uneducated, I will let you choose. Apparently the CDC has admitted there never was a pandemic by updating the real figure of deaths in the USA where they died of supposedly Covid and nothing else is actually only 6% of the reported death numbers. Australia hasn't been as forthcoming with the data, not separating those that died WITH COVID rather than FROM COVID. <https://rightsfreedom.wordpress.com/2021/07/02/according-to-the-cdc-there-is-no-covid-pandemic-there-never-was-a-covid-pandemic/>

Even the Australian governments' own numbers do not give any indication that there is anything to be worried about. A total of 7 deaths from Covid in QLD, and 910 in the whole of Australia since the start of Covid in January 2020. While in 2017 1255 died from Influenza here in Australia, that number more than doubles if we add pneumonia and other respiratory disease, like is currently the case for COVID numbers. Queensland health didn't make people prisoners within their State or even their home then, they didn't wreck the economy and violate every Australians' human rights then, or any other flu season when they were still recording Flu statistics (which they obviously no longer are as EVERYTHING is COVID). Also in 2017 Diabetes took 4,839, Dementia took 13,729 and the highest killer was heart disease at 18,590. These figures are so much higher than those that have been attributed to Covid, yet we've thrown our economy into the toilet and invested so much into fighting this Covid only. Whilst also causing an increase in suicide and death by domestic abuse, "In Queensland, since 1 May 2018 until 1 May 2019, eleven people have died as a result of domestic violence". That's more than COVID in 18 months here in Queensland and that was the year before people were locked in their homes with their abuser! Then there are the family violence suicides One hundred and twenty people involved in Queensland domestic and family violence cases died by suicide in the three years to last July. Then we add the suicides not related to Domestic violence.

See references from YOUR own data:

[3303.0 - Causes of Death Australia 2017](#)

<https://www.abs.gov.au/ausstats/abs@.nsf/Lookup/by%20Subject/3303.0~2017~Main%20Features~Australia's%20leading%20causes%20of%20death%202017~2>

In the period of this so called pandemic (Jan 2020 - March 2021) overall Deaths were above others years but NOT because of COVID. According to The ABS "Numbers of deaths due to cancer, dementia and diabetes were above historical averages". QLD Health is killing people with these measures that they say will protect them. People are either not receiving the treatment they need because hospitals are shut down or they are to frightened to seek treatment because they are so scared of COVID. Of the total deaths in Australia due to Covid only 5 have occurred since October 2020, and of those only 1 this calendar year! <https://www.covid19data.com.au/deaths>

Yet 335 people have died that recently had a Covid19 vaccine in this calendar year (since vaccines only came out this year)!

<https://www.tga.gov.au/periodic/covid-19-vaccine-weekly-safety-report-01-07-2021>

Since when have we reported on the number of cases of influenza constantly on the TV; in an attempt to put fear onto the Australian public? When has QLD Health had the right to strip us of our basic human rights? When has the Police wasted time on face masks instead of murder, domestic violence, child abuse and abduction? Never. So why have we been reporting cases of Covid in the last 2 years?

QLD health CANNOT be trusted with these powers they have already proven that over the last 18 months. Whilst every day Australians are locked in their homes, state and most definitely Country the Prime minister goes on a Pub crawl around Cornwall UK and Annastacia Palaszczuk wants to go to the Olympics. [REDACTED]

I definitely do not support extending or increasing any powers this government (both state and federal) has over Australians for any reason, in fact I believe it should release all Australians of it's grip on our throats for no valid reason. Lift all restrictions due to Covid.

Sincerely
Fiona Perl
QLD resident
