Subject: OBJECTION to extension of State of Emergency powers
Date: Wednesday, 7 July 2021 1:32:36 PM

To Whom it may concern,

I am writing as a concern citizen of Brisbane Queensland. My name is Peita Anne Rollings of [REDACTED] and I wish to express my direct concern for the proposed extension of the State of Emergency powers to 30 April 2022.

The extension of the SOE powers is in flagrant disregard to our human rights, The Nuremburg Code and The Bio-Security Act. The extension of this codes will impose a Nazi-esk environment for all Queenslanders as it gives the government unprecedented powers that include the ability to impose restrictions of free movement, ability to conduct business, ability to travel, attend school, go to church or sport as well as issuing useless mandates for wearing masks, social distancing and capacity numbers.

We urge the members to look a the figures of serious COVID cases, the number of COVID cases that result in hospitalisation and death in comparison to the enormous toll lockdowns, restrictions and other mandates place on Queenslanders. With ZERO deaths from COVID this calendar year it is completely unreasonable to extend this bill until April 2022.

COVID is not killing people. COVID is not putting people into ICU. COVID is not even putting people in hospital. If COVID was "a deadly virus" than why do you need to be tested to know you have it? If it was as deadly as the Government would like us to believe we wouldn't need to test thousand and thousands of people to get 2-3 positives that have mild to no symptoms.

As a citizen I urge the Government to remember that they WORK FOR US and our interests and ot the financial interest of the pharmacy companies.

Regards

Peita Rollings
