Amendment Bill 2021

To whom it may concern.

As a citizen of Queensland and Australia I am extremely concerned with the push to remove our rights and extend the powers. I do not support one part of this bill and express my concern over this matter and demand my voice be heard. I would like it noted that do not consent and I do not support this bill. This last lockdown without warning has likely killed my business. There are no supports in place and you happened to take my next three months of income and it's the latest lockdown. I cannot risk that you keep doing this. If perhaps my business does survive I rely on a three day workshop each school holidays and now I know you will lock the state down in order to keep these powers alive I cannot in good conscious just keep allowing it to happen.

Kind regards

Kellie Rossiter
