**Subject:** Submission for Public Health and Other Legislation (Further Extension of Expiring Provisions) Amendment Bill 2021  
**Date:** Tuesday, 6 July 2021 9:42:36 PM

---

Dear Sir/Madam,

Submission made on behalf of myself, [REDACTED], as an independent individual,  
residing at [REDACTED].  
Email address: [REDACTED]

I hereby submit my official submission to the above Bill due to the substantial and valid reason stated below. As a mother of 3 young children and a proud citizen of Australia, I stand firm in my disbelief that such things are attempting to pass through our parliaments without so much as a public enquiry, ballot, or even the general public being notified of such intentions.

There needs to be a public discussion on the great danger posed to Queensland's democracy by all these rolling emergency powers, lockdowns and abrogation of citizens' rights. Powers granted under emergency legislation are supposed to be exceptional and time-limited. After 18 months, there is no justifiable reason why the Government can't legislate for more reduced powers that allow Government to deal with the situation at hand while restoring many of the State's normal democratic processes.

As defined below

## 1. POLICY AIMS AND SOLUTIONS

Submission consideration:

On Page 16 of the Explanatory Notes to this Bill it states that "There is no alternative method of achieving the policy objective.". Since this seems to be your first attempt at consultation with the general community (p38), it would seem that this statement would lead you to disregard and dismiss any comment from the "broader community" and any suggestions for an alternative solution set. If you do so, then this would show a total disregard for a voice of the people of Queensland who elected this government which claims to be their representatives. So I trust you will not censor and seriously consider with due unbiased diligence any submissions to you by the "broader community".

Policy Aims:

To protect the health, safety and welfare of Queenslanders; mitigate the spread of COVID-19 in the community; and facilitate the continued functioning of Queensland's institutions and economy to the extent possible, protect the health of the public.

The emergency powers to be legislated must be carried out such that "the person giving the direction or order must reasonably believe that it is necessary to assist in containing or responding to the spread of COVID-19. ....must be revoked if the Chief Health Officer or emergency officer is satisfied the direction is no longer necessary."

Note: the Public Health Act that this Bill is modifying DOES NOT define EMERGENCY.

## 2. COVID-19 THREAT.

Firstly the existence of a virus called COVID-19 has yet to be proven by empirical science as opposed to a graphic computer theoretical construct or a registered patent. (first patented in the Pirbright Institute in Surrey 2016 & 2017 then later in the USA). Neither the university of Western Australia [https://www.drrobertyoung.com/post/university-of-western-australia-no-record-of-isolation-or-purification-of-cov-by-anyone-ever?](https://www.drrobertyoung.com/post/university-of-western-australia-no-record-of-isolation-or-purification-of-cov-by-anyone-ever?utm_campaign=2e12101b-0039-4f09-93ab-4fdb897e301e&utm_source=so&utm_medium=mail&cid=798ddd86-a53a-45fc-b2a3-)

e41c786aca15

nor the CDC

<https://www.drrobertyoung.com/post/cdc-now-admits-no-gold-standard-for-the-isolation-for-any-virus>

can find anyone anywhere in the world who has isolated COVID-19 virus.

Since it has never been collected from patients, isolated, then used to prove causality as per Koch's protocol, it cannot be said to cause the symptoms attributed to it. There are other explanations for the symptoms seen.

Hence also 'variants' have never been isolated and proved to cause disease. As I am not a scientist, I question how a 'virus' can be DNA sequenced as I understand that it cannot exist outside a host cell, in this case a human cell. Therefore COVID-19 virus is not an actual threat or the cause of the perceived threat.

Transmission can never be proved either as a positive PCR test does not prove transmission (see below under PCR TEST). Since transmission is not provable it cannot be scientifically proven that this 'new' or any other 'variant' can be more severe, or contagious than another. "Community acquired cases" cannot be proven either.

### 3. PCR TESTS

The standard test for COVID-19 is the PCR test. The inventor of the PCR test said it was never designed to diagnose ANYTHING. The sample taken from a patient is first minuscule and from only one site in the body. Whatever is present at that point (usually the nose) cannot be said to be throughout the body like in a blood test. So first it does not determine extent or quantity nor severity. The procedure itself is dangerous as it can penetrate the thin membrane and permit brain fluid to be released.

The "positive or negative" result of the 'test' is not a definite result as with a positive or negative battery charge or a litmus test result. It is complex and counts particles, not the virus, in the sample which is magnified many times. These particles can at times be just a part of a normal metabolism. Coca Cola, paw paw, diesel fuel and a goat have all tested positive.

As a fellow petitioner, I therefore, request the house to:

1. Oppose the bill and request the government prepare a new one that better reflects the paramountcy of Parliaments and citizens rights.
2. Make public, without reduction, all data, modelling and forecasts used by the Government in the decision-making process;
3. End the overuse of delegated legislation, which override the Nuremberg Code of Ethics and our basic human rights.
4. End QR 'Sign in' mandates for shops and businesses and allow people who are not at high risk from the virus, due to age or co-morbidities to resume normal living
5. End the mandated vaccinations, until such time they are proven ethically and morally safe for humans by unbiased, third-party clinical testing. Stop using us as guinea pigs.
6. Normalise democratic processes and freedoms in Queensland.

I am so fearful of what our country is coming to. Why are our Members of Parliament not speaking for the people?

Sincerely,

[REDACTED]
