Once again I write to you asking that you do not sack the councillors. I cannot believe that my democratic right means nothing to you.

You refer to ratepayer funds being squandered etc. What about the tax payer money the government has spent wasted? What about any of the elected ministers that have admitted wrong doing that are still sitting in our parliament? One or two of them so all ministers should be sacked and an administrator should be appointed. Where is the common sense here? Yes there are people charged in Ipswich but nobody has had their day in court yet. What will you do if these people are found not guilty? Their lives have been ruined by your witch hunt.

I have always been a labor party supporter/member but have resigned in disgust with these actions.

Don't punish good hard working people. And start telling how hard these people work 24/7, no sick pay, no holiday pay and no severance pay for much less than the public think they receive in remuneration.

Thoroughly disgusted.
