Submission to parliamentary committee inquiry into the
Mineral and Energy Resources (Financial Provisioning) Bill
2018

Dear Committee Chair,

I would like to express my strong view that any mining operators in Queensland should have to factor into the costs of their operation, the cleanup, including filling in the mine after they have extracted resources.

No mine should be allowed to left as a void, with the expectation that the Queensland public should have to pay for the site rehabilitation or suffer the environmental destruction.

That is all I wish to say.

Thank you and best regards,

Rebecca Lambert
