Long-term Goal

Energy efficiency case studies – saving money and the environment through energy efficiency improvements,

Derive Passive Funding from the Sun over the next 50 years for Kith and Kin Association Ltd.,

To reduce utility costs and carbon foot print associated with our service delivery,

To be a responsible corporate citizen, caring for the environment and our clients....sustainably!

Client Wishes

- Our Clients require access to continuing State and Federal Government Funding to enable Kith and Kin Association Ltd. to deliver positive outcomes, sustainably and into the Future.
- “Future Proof” Kith and Kin's Utility Expenses whilst reducing our “Carbon Foot Print”, turning disabilities into Abilities.
- Free up valuable monetary resources to create greater efficiencies with our daily operations as NGO's actually deliver Government Policies on behalf of the Community, cost effectively.

Fulfilling Government Needs

- Delivering professional services to people with a disability whilst demonstrating Leadership, Innovation and Corporate Responsibility towards our Community and the Environment as a Government Funded NGO, Charity.

Next Steps of Action

- Have Government Legislate for NGO's to receive Grid Connected Electricity Income from the “first” kilowatt produced
- Change Building Codes to reflect the preference for sustainably produced building materials including Solar Hot Water systems on every new home built so as to reduce “carbon foot print” throughout the State of Qld..

FUNDING FROM THE SUN

The Sun has the ability to generate valuable Income, Forever, rather than rely on the competing interests from Government Budgets.

A once off “Capital Outlay” installing Solar Panels on NGO buildings, Government and Local Authorities owned buildings, will deliver daily income to assist in Funding NGO's, delivering services to people with disabilities.

THE SUN.....You Can Bank on it!!!!
