Subject: Fluoride

I submit that this practice be stopped completely as poisoning the WELL is an act of TERRORISM.

Purposely putting poisonous substances such as fluoride and other toxic chemicals in the public water for the express purpose of medicating the population is immoral and a crime against humanity.

This practice is an absolute fraud and has been since it was started over 50 years ago. This is not safe and is slowly poisoning the public,

The government would save millions of dollars by NOT DOING IT !
