Subject: No Fluoride

031

I would like to voice my objection to fluoride being added to our water on the following grounds:

It is a poison that is not flushed from the body EVER so not matter that we are told that it is a microscopic amount that we consume, it accumulates.

The major uses of water are farming, washing and toilet systems so the fluoride in the water is a complete waste.

If people are so worried about their teeth they can take fluoride tablets.

If the government is so worried about peoples teeth they could supply fluoride tables FREE OF CHARGE for a fraction of the cost of mass fluoridation.

The huge amount of money required to add fluoride to our water system is obscene as it is of no advantage and a criminal waste of tax payers money .

I also object to governments that bloody mindedly make unpopular decisions and stick to their guns no matter what.

Haven't we had enough increases in fuel, energy and food and the aftermath of the floods increasing insurances and rates without yet another expense being passed onto councils which will in turn pass onto the rate payers.
ENOUGH!!!
