Subject: Fluoridation of water supply

Dear Sir/Madam,

We would like to submit our objections to the fluoridation of the Bundaberg water supply. Our concern is that the cost is prohibitive and the money could be better spent on essential services like the rescue helicopter etc. rather than fluoridating our water supply as 98% of it will be wasted on the garden or washing and bathing. I and my wife both have false teeth and besides this why would we want another poison going into our bodies. If people want fluoride then may I suggest you put the money into the council coffers to buy fluoride tablets which we had several years ago and this will satisfy everyone; those who want fluoride and those who don't and the cost will be only a fraction of this huge ridiculous scheme that you want to force onto us.

Thanking you for your time and consideration of our submission

Neville & Betty Maultby
