Re Subdivision 3B Injuries sustained by firefighters

36c Meaning of exposure incident

This should also include exposure incidents when on flood relief and clean up after cyclones.

There are many hazards and high risk of injury that the firefighters face while performing these tasks such as poisons, oils and fuels, asbestos.

Re 36D Presumption of injury 1 (c)

This should be deleted. Why does this only apply to the volunteer firefighters? The number of fires or incidents should not be taken into account as the firefighters can be contaminated regardless of how many incidents they attend.

Margaret Carrick (Secretary)

Les Lane (First Officer)
