This act is purely and simply disgusting and disturbing. Babies are living, breathing being well and truly before 22 weeks. How can a person be charged for killing an animal with whom is carrying a baby, and that person is not only charge with the death of that animal but also the baby inside, yet we are so inconsiderate with human life. Why not make adoption laws in Australia better. Allow family's, with whom can't have a baby naturally, and there are thousands, to adopt these precious lives that are literally being flushed away. There are over 14,000 abortions done yearly already, must we increase that number?

There's also a thing called the [REDACTED]. [REDACTED]. It's been captured many times. YouTube it and you'll find something.

There are sooo many other options available. Please reconsider

[REDACTED]

off date for abortions up to 36 weeks 🙄.
That's right! They say a baby at that point
feels no pain and has no rights to life. 🙄 If
anyone was wondering what a baby looks
like at 36 weeks, here's a picture of my
princess. Born at 36 weeks. Share this post,
get the word out!
