As I am sure you are well aware:

1. There is no protection for babies who may have survived an abortion.
2. Baby girls are particularly at risk of "sex-selected" abortions
3. Also there is no protection for hospitals (medical staff) to conscientiously object to being involved with an abortion (which they rightly consider "murder")

I am alarmed that anybody could *stoop so low* as to terminate the life of an unborn **innocent** child, yet we **protect** the lives of murderers and let them out of prison and some go and do it again (which means we are not protecting the innocent who are being murdered by same).
