Just wanted to share my experience. In 1980 I was pregnant with a child to an abusive alcoholic husband. If abortion had of been readily available I think I would have taken that option. However I had my little girl and what a joy she has turned out to be, I can't help but think what I would have missed out on if my very depressed and confused mind had of made a different choice. I ask that you sincerely consider this bill before parliament. I can't even imagine the torment I would be going through now had I chosen differently yours sincerely, Iris Thomas [REDACTED]
