Subject: Submission against the proposed Labor abortion bill
Date: Monday, 3 September 2018 11:00:41 PM

To the Health Commission,

I wish to voice my thoughts on Labors extreme abortion bill and whole heartedly OPPOSE this horrendous bill. It would allow abortion FOR ANY REASON up until the DAY OF BIRTH. The fact that any person could even contemplate supporting the ending of a fully developed child's life as it is about to be born is beyond my comprehension.

This proposal does not support women's health as Ms Trad claims and is in fact anti-woman and anti-choice. It will allow for sex selection abortions and this will mean more girls will be aborted compared to boys. There will be no choice for a doctor who has a conscientious objection to abortion to protect their rights (interesting how politicians allow themselves a conscience vote on this important issue, yet will take this right away from a doctor!) The immense psychological harm that many, many mothers suffer from after an abortion is also being ignored.

This extreme bill is not what the majority of Queensland people want and yet the Labor party is so influenced by female politicians who are part of Emily's list, that they are totally ignoring this fact.

I beg the commission to not ignore the Queensland people who value both the life of the mother and her unborn child.

DO NOT ALLOW THIS BILL TO BECOME LAW IN QUEENSLAND (it is disturbing enough that Victoria and Tasmania allow the killing of these precious babies).

Regards,
Colina Knol
