To whom it may concern

I would like those of you who are involved in this committee, to take this decision very seriously. There are politicians who are pushing their own agenda without consideration of the severity of the matter. The bottom line is that abortion is murder. These little babies aren't being given the opportunity to live because someone has decided they don't want the inconvenience, expense, the particular gender or worry of a sick child. There is such an option as adoption.

There is proof that a baby feels pain very early in its development and yet abortionists don't even want to think about that because for them it's all about the money. To make matters worse, Jackie Trad wants to make it that a living baby can be murdered at any stage in the pregnancy for any reason. It is very rare that a woman's life would be at risk because of a pregnancy so that shouldn't even come into the discussion. It is also a fact that women who have had abortions, at a later time, suffer mentally and emotionally as a result of taking their baby's life. There are groups and organisations that are available to help women in this position, so they don't take this drastic step and kill a precious little life that didn't even ask to be conceived.

I ask you to think of the baby. These little ones have the right to live, just like the rest of us.

Yours sincerely
Anne Smith
