Re: Please make a choice to protect the unborn

Dear Communities Health,

I plead with you to say YES to LIFE. All life is precious, including that of the unborn and they need our protection. The unborn children need us to speak up for them, as they cannot speak for themselves. PLEASE support LIFE. I also would like to see the protection of doctors who do not wish to carry out an abortion, by NOT being forced to refer to a doctor who has no such objection. I believe that passing this proposed new legislation will not serve to benefit women. Instead, I would like to see options and support given to pregnant women in crisis to help them make the best choice, empowering them to look beyond their immediate circumstances. A choice for life would prevent emotional scarring and possible health implications. Many thanks for your time. I appreciate you considering this submission.

Sincerely,

Katja Protheroe
