Subject: Termination of Pregnancy Bill. Submission
Date: Friday, 31 August 2018 8:13:33 PM

I strongly object to the proposed bill being passed. As a survivor of an abortion many years ago I would have been left to die in a bucket if that procedure was performed in Queensland today. Thank God I did survive and went on to produce many children, grand children and even great grandchildren. All these are proud Australians including many Queenslanders.

I speak for these 15 proud Australians who all protest to this obnoxious Bill being considered. I believe life is a precious gift and begins at conception and as such we have a sacred duty to protect the unborn future Australians.

This Bill also removes the right of medical personal to refrain from participating in the murder of the innocent. Also I strong object to the gender based excuses for termination are are unacceptable and abhorrent.

Please reject the passing of this Bill.
