Proposed Abortion Bill
Wednesday, 5 September 2018 11:24:43 AM

To the Health Committee considering the proposed Abortion Bill

I am a 68 year old father of four fabulous children and feel compelled to send this submission for your consideration.

I truly find this proposed bill incomprehensible, especially being proposed by a female and mother. If anyone suggested the reintroduction of the death penalty for such crimes as murder, rape or even mass murder and terrorism, there would be a huge outcry from the same “progressive” people putting forward this bill. So whilst the death penalty will never be reintroduced for some of the low life cluttering up our prisons, the murder of innocent, defenceless babies is going to be considered to be legislated as legal in our progressive society.

If this bill does pass and become law, I will be one of many people who will remember this government and especially the person proposing the bill, as those who legalized the murder of innocent unborn babies.

Some people talk about “karma”, others say “what goes around comes around” and others believe “you reap what you sow”. If this bill passes into law it will mark a “historic low” in politics in Australia and every person who votes in its favour [REDACTED] in the opinion of many voting Australians including myself.
