Termination of Pregnancy Bill 2018
Tuesday, 4 September 2018 7:57:22 AM

I would like to respectfully submit that the above proposed bill goes against everything we've ever learned about the sanctity of life.

There can be NO doubt that the tiny fetus inside a pregnant woman's womb is a living human being. Science has proven this. We all know it to be a fact, because we've seen the miracle of growth and development inside the womb; we've seen the high tech pictures taken at the earliest of stages. Thirty minutes of research into the developmental stages of a human baby will convince any responsible person that this is indeed a **MIRACLE OF LIFE** that we have no right to end just because we think it's the right thing to do.

Who knows how many of the tens of thousands of babies killed this way would have been great people, with talents and gifts that would benefit a family, a city, a government, science, medicine..... the list goes on and on.

How many thousands of teachers, fine fathers and mothers, breadwinners that could have provided for their families, have already been murdered this way, even while abortion is illegal? Think of the beautiful children and grandchildren you may already have, or will have in the future. Would you allow anyone to just take their lives away?

Calling the process "termination of pregnancy" is a fog cloud chosen to hide what it really is - murder! We want to give people the legal right to murder babies, but when they do it later to adults, we lock them away for a long time.

Nobody reading this proposal; nobody proposing or opposing this bill, would be doing so if their parents had decided to abort them.

God help this country if we decide in favour of this bill. History has clearly demonstrated that when nations and people groups turn their backs on God, the consequences are severe.

Respectfully yours,

Alan Foster
